## Large Capacity System

Increase Your  
Capacity For  
Production

**RICOH**<sup>®</sup>

### Large and Continuous Print Runs

The RICOH® LS3000 answers the productivity, flexibility and reliability demands of Corporate Reproduction Departments and Print-for-Pay businesses.

The Ricoh LS3000 is a large capacity loading and stacking tray system that works with the Ricoh JP5000, JP5500, JP8000, and JP8500 Priports as well as with the TC-II and the SeriPrinter™ Model 25.

**Large Loading Capacity of 3,000 Sheets.** Long awaited in the market, the LS3000 is a new, flexible system consisting of an Input Tray unit and an Output Tray unit that install quickly and easily onto your Ricoh Duplicator System.

- The Ricoh LS3000's Large Capacity Input Tray unit holds up to 3,000 sheets of paper at one time, and the Large Capacity Output Tray unit handles those 3,000 sheets as quickly as they are produced.
- Working in conjunction with your Ricoh Priport system, the straight paper path feed of the LS3000 virtually eliminates paper jams.
- High-volume users benefit by being able to run large and continuous print jobs without interruption.

#### Variety.

- The ability to use a variety of paper stocks is essential to all high-volume business users. The Ricoh LS3000 Large Capacity System handles a multitude of papers from text to cover weight stocks up to 11" x 17" in size.
- The LS3000 Large Capacity System also handles envelopes up to 10" x 13", NCR forms, and other specialty type papers.

**Reliable Paper Alignment.** The advanced technology of the LS3000 Large Capacity System makes sure your print job runs smoothly and efficiently. The Large Capacity Output Tray automatically lowers itself at constant intervals to maintain a uniform height. This allows the printed sheets to correctly fall into the tray, ensuring proper paper alignment. The unique U-shaped tray bottom and two full-support bars help keep your printed pages in perfect condition, eliminating set-off problems.

Side guides on the input and output tray can be simultaneously adjusted with a twist of the knob (conveniently located at the top of each tray unit) to accommodate various paper sizes. And, replenishing paper stock is easy. Just place a stack of sheets into the input tray and you're ready to go. Release the side guides and end plate of the output tray and your printed sheets can be effortlessly removed. It's that simple!

Perfect for Central Reproduction Departments and Print-for-Pay businesses, the Ricoh LS3000 Large Capacity System revolutionizes paper handling for all your high-volume Priport printing.

#### Specifications

##### Mainframe: Large Capacity System LS3000

<b>Configuration:</b>	Consists of two units: Large Capacity Input Tray (LCIT) and Large Capacity Output Tray (LCOT). The LCIT can be used independently.
<b>Input Tray Paper Capacity:</b>	3,000 sheets (20 lb.)
<b>Output Tray Paper Capacity:</b>	3,000 sheets (20 lb.)
<b>Minimum Paper Sizes:</b>	5.1" x 7.1"
<b>Maximum Paper Sizes:</b>	11.6" x 17.0"
<b>Paper Weights:</b>	12.5 lb. to 55.6 lb. Bond
<b>Image Position Adjustment:</b>	Can be adjusted +/- 15mm vertically and +/- 10mm horizontally. (corresponds to Priport)
<b>Applicable Paper Stocks:</b>	Handles stocks compatible with the connected Ricoh Priport
<b>Paper Feed Speed:</b>	60 – 120 sheets/minute (corresponds to the printing speed of the connected Priport)
<b>Applicable Digital Duplicator Models:</b>	JP5000, JP5500, JP8000, JP8500, TC-II and SeriPrinter™ Model 25
<b>Dimensions (WxDxH):</b>	Large Capacity Input Tray 38.1" x 21.45" x 30.63" Large Capacity Output Tray 22.05" x 20.15" x 30.63"
<b>Weight:</b>	Large Capacity Input Tray 99.23 lbs. Large Capacity Output Tray 66.15 lbs.
